Every year we strive to become more aware, and more responsible with our commitment to the environment around us. Young Office promotes energy effectiveness and investments, waste control, and disciplined shipping practices in all we do.

We have made upgrades to our facilities by transitioning to LED lighting and motion sensors in all of our office and warehouse spaces. We have recently donated nearly twenty thousand pounds of furniture and recycled eighty thousand pounds of metal that would have otherwise ended up in landfills.

We have made a substantial promise to recycle all cardboard waste in our warehouse and have processed over 250 tons of this material alone. Being good stewards of resources is inherent in every aspect of our business and culture.

Responsible by design.

Work in harmony.
